DETAILED ACTION

This is the first action with merit relating to serial application number 10/664,305 filed 09-16-2003. Claims 1-53 are currently pending.

Election/Restrictions

1. Applicant's election with traverse of the withdrawn claims in the reply filed on 9-16-2006 is acknowledged. The traversal is on the ground(s) that the examine fails to provide a reasons for the restriction. This is not found persuasive because the restriction is between a method of controlling a bicycle gearshift and bicycle gearshift having front and rear actuators which are two different aspects of the invention and the requirements of the gearshift is different for the method steps. However, upon further consideration all the claims will be prosecuted because the withdrawn claims include the languages/limitations of the elected claims.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

3. The examiner has accepted the drawing filed 9-16-2006.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140

F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-53 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-52 of U.S. Patent No. 6,988,739.

Although the conflicting claims are not identical, they are not patentably distinct from each other because they are obvious variations in breath and scope.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Motsumoto et al. (4,490,127), Browning (5,261,858), Bellio et al. (5,356,348), Watara (5,577,969), Ethington (5,599,244), Spencer et al. (6,047,230) and Kimura (6,146,297) disclose a bicycle having an electronic shift control and an actuator for actuating the gear changing device base on the information from an electronic control.
